Objective

To start my career as a software developer in a growth-oriented organization where I can apply my programming knowledge, problem-solving skills, and understanding of cloud technologies while continuously learning and contributing to real-world projects

Education

Lovely Professional University **Phagwara, Punjab**
Bachelor of Technology in Computer Science and Engineering, CGPA: 7.40 *2027*
Relevant Coursework: Cloud Computing, Software Engineering, Database Management Systems (DBMS), Artificial Intelligence

Delhi Public School **Lucknow, Uttar Pradesh**
Senior Secondary School Certificate (12th Grade), Percentage: 91% *2023*
Key Subjects: Physics, Chemistry, Mathematics, Computer

Delhi Public School **Lucknow, Uttar Pradesh**
Secondary School Certificate (10th Grade), Percentage: 95% *2021*

Technical Skills

Programming Languages: Python, Java, C++
Tools/Technologies: Docker, Kubernetes
Operating Systems: Linux, Windows,Ubuntu
Databases: MySQL

Projects

Project Title: ChatBot – AI-Based Sports Assistant
Description: An AI-powered sports chatbot built with Python and Streamlit that provides real-time sports insights, player statistics, and match updates using OpenRouter AI API.
Technologies Used: Python, Streamlit, Custom CSS, OpenRouter AI API, Requests, Logging, Streamlit Cloud
Impact/Achievements: Implemented real-time AI conversations with API integration and designed a responsive UI for enhanced user experience.
Demo/Code Link: https://github.com/aayush356/chat-bot

Project Title: E-Waste Management Website
Description: A web platform created to promote e-waste awareness and responsible disposal, featuring collection center locator and disposal request sections.
Technologies Used: HTML, CSS, JavaScript
Impact/Achievements: Developed a user-friendly and well-structured website to encourage sustainable e-waste management practices.
Demo/Code Link: https://github.com/aayush356/e-waste

Certifications

Generative AI Foundations Certification: Generative AI Foundations certification awarded by **Microsoft**, covering core concepts of generative AI, large language models, prompt engineering, and real-world AI applications. **Completed in September 2025.**
Cloud Computing Essentials Certification: Cloud Computing Essentials certification awarded by **UpGrad**, focusing on cloud service models (IaaS, PaaS, SaaS), virtualization, cloud architecture, and deployment fundamentals. **Completed in July 2025.**
Google Cloud Fundamentals Certification: Google Cloud Fundamentals certification awarded by **Google**, covering core Google Cloud services, cloud infrastructure, networking, storage, and deployment concepts. **Completed in June 2025.**

AI Recommendations for Improvement

Recommendation 1: Develop one full-stack or cloud-based project that solves a real-world problem and deploy it online to demonstrate practical software development and cloud skills.

Recommendation 2: Earn an industry-recognized certification such as AWS Cloud Practitioner to strengthen credibility in cloud computing and align with your career objective.

Recommendation 3: Improve problem-solving skills by consistently practicing data structures and algorithms (DSA) on platforms like LeetCode or HackerRank and adding the profile link to your CV.

Self-Assigned Tasks (Till 10th week of this semester)

Task 1: One fully documented project completed and deployed
Task 2: One cloud certification prepared or completed
Task 3: Minimum 80 coding problems solved and tracked online

Targets Allocated (Till 10th week of this semester)

Targets Approved by Course Instructor

- Complete certification in [Networking Basic].
- Enroll in and complete [Software Testing].
- Finish the project titled [**Cloud-Based File Storage System**] to strengthen your CV.
